

# A quieter place for your papers.

IMPORT. ORGANIZE. READ.

A small home for the papers you want to keep close. Give your library a little structure, then get back to reading.

## 01 Bring a paper in

Choose Import in the toolbar and select a PDF. Bib saves a local copy, so your original file stays where it is.

## 02 Make room for your ideas

Use the + in the sidebar to create a folder. Group papers by a project, a subject, or whatever makes sense to you.

## 03 Read, then keep the details

Select a paper to read it and select text. Open the info button to edit its title, authors, year, journal or venue, and DOI.

### Easy to find. Easy to return to.

Search your saved metadata to find a paper. This first version keeps your library on this device, with no account to set up.
